A/UX, Macintosh OS, and Desk Accessories

Article Created: 30 June 1988

Article Change History

08/31/92 - REVIEWED

•For technical accuracy

TOPIC -----

A/UX supports most of the Macintosh Toolbox routines, but does not support Desk Accessories

DISCUSSION -----

As an example, we will discuss the Scrapbook. Under A/UX, you can cut and paste while in a Macintosh Toolbox application. However, you cannot cut from one application and paste to another. When you quit the application and return to the A/UX shell, all Clipboard information is lost.
