## A/UX: The /etc/fstab File

Article Created: 15 October 1990

### Article Change History

-----  
08/31/92 - REVIEWED

- For technical accuracy

### TOPIC -----

What's the file /etc/fstab used for?

### DISCUSSION -----

The file /etc/fstab contains a list of local and remote partitions that are used by the local system. The mount command uses this list to mount those partitions when the system boots up into multi-user mode.
