Retrospect A/UX: Special Features (8/93)

Article Created: 16 August 1993

TOPIC -----

This article describes the special features of Retrospect A/UX.

DISCUSSION -----

Retrospect A/UX provides some special commands and options for choosing files with custom selectors and displaying information within browsers.

In Retrospect A/UX Selector windows, the pop-up menu of condition types contains an additional choice: file and folder selection by A/UX mode. You can use this additional condition type to select files by file type and privileges.

Within the A/UX window, the file type popup menu provides a variety of A/UX file types that you can apply to the Selector, including Named Pipe, Block Special, Symbolic Link, and Hard Linked File.

In addition, the Name (Sharing) condition window provides four new options for selecting files: A/UX owner name, A/UX group name, A/UX owner id, and A/UX group id.

For further information on working with Retrospect and Retrospect A/UX, search the Tech Info Library by "Retrospect" or "Remote."
