- For technical accuracy.

TOPIC -----

Is there any way to change the startup application, so that my system does NOT start up in A/UX?

DISCUSSION -----

To set startup to JUST the Macintosh OS in System 6, do the following steps:

- 1) If A/UX already launches automatically, then cancel the automatic launch sequence.
- 2) Quit from the A/UX Startup.
- 3) Make sure nothing is selected; click in the open desktop area.
- 4) Pull down the Special menu and select the Set Startup command.
- 5) Click the OK button.

Conversely, to set startup to A/UX Stand-alone shell automatically, and hence have A/UX boot automatically, do the following steps:

- 1) Make sure you are at the Finder level.
- 2) Click the A/UX Startup icon.
- 3) Pull down the Special menu and select the Set Startup command.
- 4) Click on the OK button.
