Needed: Internet Router-Like Product for IP Routing

This article last reviewed: 1 June 1990

TOPIC -----

Do you know of an IP routing product that works like the AppleTalk Internet Router? Specifically, I am interested in a product that is installed on a Macintosh that does IP routing.

I like the functionality and flexibility of the AppleTalk Internet Router but need IP routing.

DISCUSSION -----

As of April, 1990, there are no IP routing products that work with or like the AppleTalk Internet Router. (We have had repeated requests for this type of product.)
