Apple Ethernet NB Card: Power Consumption

Article Created: 09 July 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

How much current does the Apple Ethernet NB Card draw?

DISCUSSION -----

The Apple Ethernet NB Card draws 3.96 watts at 5 volts. The recommended wattage limit for each NuBus slot is 13.9 watts.

The overall power-draw audit of the Ethernet NB Card (including power consumed by an external AAUI transceiver) is 1.165A.

AAUI cabling should not exceed 1.5m.
