TOPIC -----

How do I install the drivers for an Apple Ethernet board on a Macintosh IIsi?

DISCUSSION -----

This procedure will install the EtherTalk drivers as well as the Network CDEV into your System Folder:

- 1) The Macintosh IIsi comes with a disk called Network Products Installer. Start your Macintosh IIsi with this disk.
- 2) Launch the Installer.
- 3) Click OK.
- 4) Select EtherTalk.
- 5) Select the drive you wish to install to.
- 6) Click on Install (at some point during this procedure, the application will ask you for your EtherTalk Installation Disk).
- 7) Quit after installation is complete.
- 8) In the Control Panel, select EtherTalk.
