EtherTalk: How To Install for AppleTalk Phase 2 Compatibility

Article Created: 14 June 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Where can I find a copy of the EtherTalk Interface driver that's compatible with AppleTalk Phase 2?

DISCUSSION -----

You need to run the Network Product Installer disk and tell it you want to install EtherTalk. When it asks for the disk, insert the EtherNet Installer Disk 2.0.1. This will install the AppleTalk Phase 2 drivers.
