Protecting Ethernet Networks from Power Surges (8/94)

Article Created: 24 August 1994

TOPIC -----

Are there any companies that sell products which can protect Ethernet networks from damage caused by lightning strikes or electrical surges?

DISCUSSION -----

There are a number of products on the market that can be used to protect incoming power, telephone, and network systems. The list below provides a small sampling of companies that sell products designed to protect Ethernet networks against electrical surges and spikes.

Use the company names as keywords to search for more information about these companies. Please contact each company for a description of the products they provide.
