ABS Tech Note: AWS00 About AWS Technical Notes (11/94)

Article Created: 14 November 1994

TOPIC -----

This document accompanies each release of Apple Business Systems Technical Notes.

DISCUSSION -----

We want Technical Notes to be distributed as widely as possible, so they are sent to all Partners and Associates at no charge; they are also posted on AppleLink in the Developer Services Bulletin Board.

We place no restriction on copying Technical Notes, with the exception that you cannot resell them, so read, enjoy and share. We hope Apple Business Systems Technical Notes will provide you with lots of valuable information.

Technical notes are a 'living' complement to product documentation, be it Inside Macintosh or other documentation. This means that they are updated on a regular basis, so as to be accurate and up to date. New Notes are added as required.

This technical note is an index of all technical notes related to the Apple Workgroup Servers and related products. It also documents all changes to the technical notes since the previous release.

Note: we are also including for your convenience the technical documentation from the third party vendors of the Apple Workgroup Server products Oracle 7 and Retrospect. These documents were not written by Apple or tested for accuracy, but are included because we feel you might find them useful.

Index

Technical Note	Subject	Last Revision
-----	-----	-----
AWS00:	About AWS Tech Notes	Dec, 1993
AWS01:	Correct Platform Choice for 4D Servers	Dec, 1993
AWS02:	SCSI Termination on AWS 95	Dec, 1993
AWS03:	(Obsolete. See note A below)	
AWS04:	(Obsolete. See note A below)	
AWS05:	(Obsolete. See note A below)	
AWS06:	(Obsolete. See note A below)	
AWS07:	(Obsolete. See note A below)	
AWS08:	AWS95 kconfig modifications	May, 1994

AWS09:	AWS95 buffer cache Q&A	May, 1994
