ABS Tech Note: DAL12 No Multiple Cursors, Teradata/Sybase (6/92)

Article Created: 30 June 1992

TOPIC -----

This article describes a feature of DAL that is not supported by Teradata and Sybase.

DISCUSSION -----

There is one feature of Data Access Language that is not supported by Teradata and Sybase, which is the ability to have multiple cursors open at the same time. Since Teradata and Sybase do not support this feature, applications which utilize the multiple cursor feature will have to be aware of this constraint when accessing data from a Teradata or Sybase database.
