## Apple Workgroup Server 95 and File Locking Management (6/93)

Article Created: 11 June 1993

TOPIC -----

What mechanism does an Apple Workgroup Server (AWS) 95 with A/UX and AppleShare Pro use to manage file locking in an inter-networked environment? For example:

- AppleShare volumes
- NFS mounts

DISCUSSION -----

AppleShare Pro will provide file locking mechanism for the finder environment.

Under the Unix environment, the A/UX kernel will provide locking mechanisms like `rpc.lockd`.
