AWS 95: Hardware Upgrade Program (3/94)

Article Created: 13 February 1994

TOPIC -----

This article describes the hardware upgrade program for the Apple Workgroup Server 95 (AWS 95) which provides support for up to five hard drives.

DISCUSSION -----

There is a new disk subsystem that provides support for up to five hard drives inside the AWS 95 enclosure (older configurations support two internal hard drives). The new disk subsystem will be included with the two new AWS 95 configurations. Existing AWS 95 customers can obtain the hardware upgrade (new hard drive bracket and new SCSI cable) from their local Apple Authorized Service Provider or Apple Reseller. An Apple Authorized Service Provider is required to install the new disk subsystem.
