## Wrkgrp Server 6150 & 8150: About This Macintosh Results (1/95)

Article Created: 16 May 1994

Article Reviewed/Updated: 10 January 1995

### TOPIC -----

With the appropriate enablers installed in the Workgroup Server 6150 and 8150, they appear as Power Macintosh 6100/60 and 8100/80 computers respectively under About This Macintosh.

Aren't there new enablers for the WS 6150 and 8150? Should I use the WS 9150 enabler?

### DISCUSSION -----

New ROMs and enablers for the WS 6150 and 8150 were not introduced. They use the same as the Power Macintosh computers and "About This Macintosh" will report a Power Macintosh 6100/60 or 8100/80.

Only the WS 9150 has new ROMs and an enabler which only work in the WS 9150.
