Modem: Using Register Feature as Testing Option (6/96)

Article Created: 5 June 1996

TOPIC --

This article describes how to test the modem dial out functions.

I just setup my new Performa 640. I am trying to get the modem to dial up a
bulletin board but I am not sure I have the ZTerm application setup correctly or
if the modem is functioning correctly. Is there an easier way to test the
modem?

DISCUSSION --

As a simple alternative test option you can use the registration feature of the
modem. The registration feature is previously setup by the modem manufacturer.
If you have a Global Village modem installed use the following steps:

• Open the TelePort control panel. (Use the PowerPort control panel for Global
Village modems installed in PowerBook computers)
• Select the "Register..." option in the control panel.
• Follow the instructions as prompted.
