MacX Does Not Support LAT (4/93)

Article Created: 7 April 1993

TOPIC -----

Does MacX support the LAT tool? I was told by someone that it did, but I couldn't get it to work. If so, what are the tested configurations?

DISCUSSION -----

Currently there is no support for LAT in MacX. The only support included is for the AppleTalk/DECNet Tool, DECNet Tool, and MacTCP Tool.

At this time there are no plans to add support for LAT in MacX.
