IBM 3193 Displays

This article last reviewed: 30 May 1989

The 3193's are "image processing" devices. IBM "image processing" devices use predefined (fixed) graphics images. These images are treated like character sets and are called "graphics symbol sets." The 3193 product line is used on 370-architecture systems with specialized applications.

Displays and Phosphors

The 3193 features black on white displays with 15-inch screens. They support mod 2, 3, and 4 formats plus a 48X80 image-processing format. The 3193 screen is designed as a full-page display.

Keyboards

The 3193 supports the 102 and 122 key keyboards. The keyboard is waterproof, and can be modified in setup mode. The keycaps can be removed and replaced for specific applications.

Special Features

The 3193 does not support the printer port. The 3193's can support attachment of IBM 3117 and 3118 scanners.

Pricing

The 3193 series devices are priced as follows (list price as of 8/17/88) A one-year warranty is offered with the 3193.

Model 010 \$2610

Model 020 \$2610
