HD20: Line voltage

Appendix A of the HD 20 Manual states that the HD 20 will work on a line voltage of 85 to 270, RMS, 47 to 64 Hz. This means that the HD 20 works without stepdown transformers, automatically switching for the power source voltage range, the 220 volt range being the most common overseas. All you need is an adapter plug for the specific locale.
