Monitor II PROBLEM/CURE: Display Shrinks

This article last reviewed: 29 April 1988

PROBLEM DESCRIPTION: After the power is on for about 5 minutes, the display shrinks to a 3 inch (approximately) square.

WARNING: Turn off the Monitor II and unplug it whenever the case must be removed for the procedure below.

CAUSE: The regulator is loose or has become damaged from excessive heat.

CURE: Remove the regulator and replace it with a new one. Be sure to use a heat sink compound before tightening down the the regulator to the heat sink.

If the above cure doesn't solve your problem refer to the Tech Procedures to obtain the general troubleshooting procedure for this product.
