Using ImageWriters Overseas

This article last reviewed: 31 May 1990

TOPIC -----

How do I adapt an ImageWriter I or II for European power 220V 50Hz?

DISCUSSION -----

The ImageWriter I printer requires a grounded, step-down, isolation transformer when used with a 220V power source. Using the ImageWriter I printers on a 50Hz source can noticeably affect spacing between characters.

There are already several articles in the Tech Info Library that discuss the ImageWriter II:

- "Part Available For Using ImageWriter II And ImageWriter LQ Overseas"
- "Electrical Specifications of Most Apple Hardware"
- "Using Apple Equipment Overseas"
- "Traveling with an Apple" contain more information.

Use the search criterion of "Overseas".
