## Macintosh Classic II: Math Co-Processor Card Availability

Article Created: 13 January 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Can I put a math co-processor in a Macintosh Classic II?

DISCUSSION -----

Though Apple has no plans to produce such a card such, the Macintosh Classic II has a processor-direct slot (PDS) for which third-parties could produce a math co-processor card.

Check periodically the Redgate library on AppleLink for a current product list of available cards.
