## Express Modem: Converting faxes to PICT file (5/94)

Article Created: 02 May 1994

TOPIC -----

I have been using the Express Modem in my PowerBook Duo computer to receive fax documents. I am trying to convert a FAX document to a PICT file, however on a 13-page document only the first page is converted. The user's guide states that it will convert all pages at once. Is there a way to do this?

DISCUSSION -----

The manual is in error. The latest manual (beige cover) which is shipping with PowerBook Duos correctly states that the conversion to a PICT file happens one page at a time.
