## Power Macintosh 5400: Compatible w/ QuickTime Conf.? (6/96)

Article Created: 20 June 1996

TOPIC -----

I am attempting to install QuickTime Conferencing 1.0.2 (from the QuickTime Conferencing 1.0 CD) on my Power Macintosh 5400/120 computer. Each time I do so, an error message appears reporting that Network Software Installer 1.5 or later is required. However, when I then attempt to install Network Software Installer 1.5, another message appears stating: The file 'Network' on disk 'Macintosh HD' cannot be replaced by the Installer. No installation will take place. Please move the file to another folder and try again."

I cannot locate a file called "Network" on my hard drive, so I am unable to perform the installation. What can I do? Is QuickTime Conferencing compatible with the Power Macintosh 5400/120?

DISCUSSION -----

QuickTime Conferencing v1.0.2 is not compatible with the Power Macintosh 5400/120. Instead, you should install QuickTime Conferencing v1.0.3, which is in the Apple Extras folder on the hard drive of the Power Macintosh 5400 Series CD.
