Performa 5200 & 6200: Upgrade for 14.4 Internal Modem ? (9/96)

Article Created: 25 July 1996

Article Reviewed/Updated: 24 September 1996

TOPIC -----

Is it possible to upgrade the Global Village Gold IIv 14.4 Kbps internal modem, which is included with certain Macintosh Performa 5200 and 6200 series computers, to 28.8 Kbps?

DISCUSSION -----

Apple does not offer an upgrade for your modem. However, Global Village has recently released an upgrade path for your modem. This upgraded internal modem would replace the modem already installed in your computer.

Contact Global Village Communications directly (800-469-3764) to order this modem or to obtain additional information, including compatibility with specific computer systems and pricing.

Note that support for this modem, once installed on a Performa computer, will be provided by Global Village directly. Apple only supports Global Village modems which are bundled with specific systems.
