## Power Macintosh 7500 and 7600 Series: 150 MHz Processor? (5/96)

Article Created: 03 May 1996

TOPIC -----

Will the 150 MHz processor card that is used in the new configurations of the Power Macintosh 8500/150 and 9500/150 computers work in the Power Macintosh 7500 and 7600 series of computers?

DISCUSSION -----

Apple does not currently offer the 150 MHz processor card for use in the Power Macintosh 7500 and 7600 models. The Power Macintosh 8500/150 and 9500/150 computers are currently the only Apple products that are available with the 150 MHz processor card. In the future, Apple may announce an upgrade path to the 150 MHz processor card.
