## **FWB Hard Disk Toolkit: System 7.5.2 Incompatibility (6/96)**

Article Created: 08 December 1995

Article Reviewed/Updated: 04 June 1996

TOPIC -----

I have a PCI-based Power Macintosh computer which uses System 7.5.2. Recently, I've noticed that my hard disk has become locked, and I'm unable to write anything to the disk. I am using FWB Hard Disk Toolkit to mount an external drive. What could be going on?

DISCUSSION -----

Versions earlier than 1.8 of FWB Hard Disk Toolkit are incompatible with System 7.5.2 and higher. FWB does have a solution for users who are experiencing this problem. This solution is described in the Read Me included with the FWB utility, Unlock Volume.

Contact FWB's technical support center for additional assistance.
