PowerTalk: Version 1.0.2 vs 1.0.3 on Power Macintosh (4/94)

Article Created: 20 April 1994

TOPIC -----

Why is PowerTalk For Power Macintosh version 1.0.2 being made available? Wasn't PowerTalk For Power Macintosh version 1.0.3 already available?

DISCUSSION -----

Apple is recommending that customers use version 1.0.2 PowerTalk Install Me First disk when installing PowerTalk on Power Macintosh and Power Macintosh Upgrade Card systems.

A problem was discovered with the installer script on the PowerTalk For Power Macintosh version 1.0.3 Install Me First disk. The problem was that it would not install properly on systems with Power Macintosh Upgrade Cards. This problem does not exist on the PowerTalk For Power Macintosh version 1.0.2 Install Me First disk. Except for the installer script, the software contained within the 1.0.2 & 1.0.3 Install Me First disks is identical.
