Quadra 700: Power Macintosh PDS Upgrade Blocks NuBus Slot (3/94)

Article Created: 10 March 1994

TOPIC -----

If I install the Power Macintosh PDS Upgrade Card in my Quadra 700, can I still use both NuBus slots?

DISCUSSION -----

No, the \$E NuBus slot (the one closest to the outside case) must be empty in order to install the Power Macintosh PDS Upgrade Card. The PDS and NuBus slots are in line with each other in the Quadra 700, you can install either a PDS card or a NuBus card but not one of each.
