At Ease 4.0.1: Require New Password on Next Login (2/97)

Article Created: 11 February 1997

TOPIC ---

When I create a new user in At Ease Admin 4.0.1, I am not able to select the
Require new password at their next login checkbox. The option is available (not
dimmed), but the box cannot be selected. This feature worked correctly before
updating from At Ease 4.0 to 4.0.1.

DISCUSSION --

Workarounds

• Create new users with the Users & Groups Manager software and you can select
the Require new password at next login.

• Save the new user, re-open it, and select the Require new password at next
login.

This issue has been reported to Apple Engineering, however, there is no known
time frame when a fix will be available.
