Calculator: You Can Paste In Formulas From Any Text Source

Article Created: 21 September

Article Last Reviewed: 27 May 1992

Article Last Updated:

A little-known feature of the Calculator desk accessory is that you can make it programmable by copying numerical formulas from other text sources into it. For example, using a word processor, type the formula, $9*8-12/24$. Now copy, then paste this formula into the calculator; the answer will appear.
