## HyperCard: Setting Text Height (7/92)

Article Created: 4 November 1990

Article Reviewed/Updated: 23 July 1992

TOPIC -----

Here's a handler you can use to set the space (in points) between baselines of text in a given field.

DISCUSSION -----

```
on mouseUp -- (or openCard or any other handler)
    set TextHeight of field x to 18
end mouseUp -- (or openCard or any other handler)
```

This handler works in versions 1.2.5 and 2.0x of HyperCard.
