HyperCard: Script to Indent Text Automatically (7/92)

Article Created: 16 January 1991

Article Reviewed/Updated: 23 July 1992

TOPIC -----

The returnInField handler makes a field indent its text automatically.

DISCUSSION -----

```
on returnInField
  get the value of the selectedLine
  put empty into indent
  repeat with i = 1 to the number of chars in it
    if char i of it is " " then put " " after indent
    else exit repeat
  end repeat
  send returnInField to HyperCard
  put indent after the selection
end returnInField
```
