HyperCard 2.x: Compatibility with Performer and Cue (6/92)

Article Created: 11 September 1991
Article Reviewed/Updated: 5 June 1992

TOPIC ---

There is a confirmed problem with HyperCard 2.x and two music applications
for the Macintosh:
• Performer (from Mark of the Unicorn Software)
• Cue Film Music System (from Opcode Systems, Inc.)

DISCUSSION --

If HyperCard is running when you try to launch these applications, the
computer freezes. This problem is caused by a bug in the copy-protection
scheme in the two applications. For latest information, contact Mark of
the Unicorn and Opcode. To locate a vendor's address and phone numbers, use
the vendor's name as a search string.
