AICK: Setting Up with Existing Service Provider (6/96)

Article Created: 5 June 1996

TOPIC -----

I have the Apple Internet Connection Kit (AICK) and I'm trying to set it up with my existing Internet service provider (ISP). When I launch the Apple Internet Dialer, it wants me to set up an account with a new service provider. How do I tell it to use my existing ISP?

DISCUSSION -----

When you first run the Apple Internet Dialer, it assumes you do not have internet access and guides you through setting up an account with a new ISP. If you already have dial-up access with an ISP, you can set it up by following these steps:

Step 1

Launch the Apple Internet Dialer application

Step 2

Choose Define Provider Information from the Provider menu.

Step 3

Enter the appropriate information for your ISP. if you do not know this information, call your ISP for the necessary information.
