## System 7: Compatibility with Macintosh Software Utilities (8/94)

Article Created: 29 May 1991

Article Reviewed/Updated: 22 August 1994

TOPIC -----

This article describes how System 7 works with some commonly-used Macintosh software.

DISCUSSION -----

The following software is no longer needed because its functionality has been incorporated into System 7:

- 800K Eject INIT
- Font/DA Mover
- Memory Manager INIT
- TrueType INIT

The following software is incompatible with System 7 and no update is planned. Users of this software should purchase third-party equivalents.

- HD Backup
- MacroMaker

The following software is incompatible with System 7, but compatible versions are included with the System 7 Personal Upgrade Kit:

Apple File Exchange	(prior to 7.0)
Disk First Aid	(prior to 1.5)
LaserWriter Font Utility	(prior to 6.0; this program has been supplanted by LaserWriter Utility)
TeachText	(prior to 7.0)

The following software is incompatible with System 7. Compatible versions are supplied with the System 7 Group Upgrade Kit, and are also posted in the Upgrade folder on the System 7 Information bulletin board:

QuickMount	(prior to 1.0.7)
Apple CD-ROM	(prior to 3.0)
The Namer	(prior to 2.1; the functionality of this program has been supplanted by LaserWriter

Utility)
