TOPIC -----

Does File sharing work with TOPS/Novell/3Com products?

DISCUSSION -----

Yes. Users can connect to shared information through a variety of means. Using the AppleShare workstation software yields the most consistent results. File sharing, Novell, 3Com, and other vendors support the AppleShare workstation software. Other vendors that don't support the AppleShare workstation software can coexist with AppleShare solutions.

However, once shared, folders accessed with the AppleShare workstation software cannot be "re-shared" with Macintosh File sharing. Macintosh File sharing only lets you share locally connected folders.

For more information, contact the individual vendors of your network setup.
