System 7: Controlling Whether Users Can Change Their Passwords

Article Created: 18 July 1991

Article Change History

09/10/92 - REVIEWED

- For technical accuracy.

TOPIC -----

How do I allow users to change their file-sharing passwords? Can I prevent them from changing their passwords?

DISCUSSION -----

- 1) Open the Users & Groups Control Panel.
 - 2) Open the user's icon. A dialog box appears.
 - To allow the user to change his or her own password, click the check box marked Allow User to Change Password such that an X appears there.
 - To prevent the user from changing the password, click the check box marked Allow User to Change Password such that no X appears there.
 - 3) Close the dialog box, saving your changes.
