## System 7: Zoom Box Improvements

Article Created: 16 July 1991

### Article Change History

-----

09/11/92 - REVIEWED

- For technical accuracy.

### TOPIC -----

The Zoom box works a little differently under System 7.

### DISCUSSION -----

When the Zoom box of a Finder window is clicked, the window shrinks to the minimum size necessary to show the window's entire contents (unless the contents are too big to fit on the screen).

Clicking the Zoom box again returns the window to its original size.
