System 7: Function of Backgrounder File

Article Created: 5 September 1991

Article Change History

09/11/92 - REVIEWED

- For technical accuracy.

TOPIC

What is the function of Backgrounder (on the System 7 Printing disk)?
There's no Backgrounder on my hard disk, yet I can print to a LaserWriter
IINTX successfully in the background.

DISCUSSION

In System 7, the function of the Backgrounder is built into the Finder. You
don't need the Backgrounder file at all if you're running System 7.

The Backgrounder file is, however, required on System 6.0.x systems that
use System 7 printer drivers if they are to do background printing.

When you run the Installer on the 7.0 Printing Tools Disk from a 6.0.x
system, the Backgrounder on that disk is installed on the 6.0.x system.
