System 7.0: Put Away Problem Workaround

Article Created: 13 August 1991

Article Change History

09/11/92 - REVISED

- To make more clear.

TOPIC -----

I'm having a problem with System 7 when I follow these steps:

- 1) Drag an application to the desktop.
- 2) Select it and use the Put Away command on it.
- 3) Close the window the Application is in. Now double-click on any document for that application.
- 4) A message says the application can't be found.

DISCUSSION -----

Here's a workaround: Don't use Put Away. Instead, drag the application to the desktop again, then drag it back to fix the problem. Rebuild the Desktop file.
