## System 7: Invisible Icon File Sizes Not Included in Folder Size

Article Created: 19 September 1991

### Article Change History

09/11/92 - REVIEWED

- For technical accuracy.

### TOPIC -----

I received an out-of-space error message when I tried to copy some folders to another disk even though the available disk space was more than enough to hold the folders I was moving.

### DISCUSSION -----

When you copy folders with custom icons to another disk, the sizes of the invisible icon files are not included in the total folder size. This can result in the out-of-space error message you received.
