## System 7: Upgrade Information for Apple Hard Disks

Article Created: 28 May 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Is System 7 compatible with all Apple hard disks formatted with HD SC Setup?

DISCUSSION -----

Some hard disks that have been formatted with older versions of HD SC Setup may require an updated driver in order to function with Virtual Memory. IT IS NOT NECESSARY TO REFORMAT THE DRIVE. If the Memory control panel indicates the drive needs updating, follow the instructions in the System 7 Personal Upgrade Kit to use HD SC Setup to update the driver.

All Apple internal and external hard disks are compatible with all Macintosh systems that have a SCSI interface.

The version of Apple HD SC Setup that ships with all hard disks is compatible with System 7, but version 2.0.4 is the recommended version.

The upgrade to version 2.0.4 is free, and the files can be found in the Upgrade folder on the System 7 Information bulletin board, as well as on the System 7 Group Upgrade Kit CD.
