System 7: Upgrade Information for Apple Scanner

Article Created: 29 May 1991

Article Last Reviewed: 12 August 1991

Article Last Updated:

TOPIC -----

Is the Apple Scanner software compatible with System 7.0?

DISCUSSION -----

Version 1.0 of the AppleScan application and the Scanner system extension are mostly compatible with System 7. Version 1.0.2 of AppleScan and version 1.0.1 of Scanner are the recommended versions. Users should upgrade to these versions after installing System 7.

Upgrades to these versions are free, and the software is included in the Upgrades folder on the System 7 Information bulletin board. Use BB Pathfinder to locate this bulletin board.

The Apple Scanner is compatible with all Macintosh systems that have a SCSI interface.
