System 7.x: Upgrade Information for MacTCP (1/95)

Article Created: 29 May 1991

Article Reviewed/Updated: 24 January 1995

TOPIC -----

Is MacTCP compatible with System 7 and higher?

DISCUSSION -----

MacTCP is compatible with System 7. The specifics follow:

- For System 7.0 and System 7.0.1, use MacTCP version 1.1 or higher.
- For System 7.1 and System 7 Pro (7.1.1), use MacTCP version 1.1.1 or higher.
- For System 7.1.2 and System 7.5, use MacTCP version 2.0.4 or higher.

Note: The current version of MacTCP is version 2.0.6.

The applications: "MacTCP 2.0.4 to 2.0.6 Patch" and "MacTCP Admin 2.0.6 Patch" are ResCompare resource patching applications. Applying the appropriate patch to a COPY OF YOUR ORIGINAL ("clean") MacTCP or MacTCP Admin control panel will upgrade your copy to version 2.0.6.

All licensed copies of MacTCP 2.0.4 can be upgraded. For users of earlier 2.x versions (2.0 and 2.0.2) must first be updated to version 2.0.4 before updating to version 2.0.6.

Article Change History:

24 Jan 1995 - Added current MacTCP information and System software.

07 Jan 1994 - Added current MacTCP information.
