Article Last Updated:

TOPIC -----

Is the Apple Tape Backup 40SC software compatible with System 7?

DISCUSSION -----

No. The Apple Tape Backup 40SC software and Tape Disk system extension are not compatible with System 7, and no update is planned. Apple recommends the use of third-party backup software for use with the Apple Tape Backup 40SC. (The Apple Tape Backup 40SC hardware is fully compatible with all Macintosh models running System 7.)

Take the following steps to recover system information from tapes generated with the Apple Tape Backup 40SC:

- 1) Use a System 6-based Macintosh to recover the files.
- 2) Use the File Sharing capability of System 7 to transfer the files to the System 7 system.

In the case of a complete hard disk recovery, follow these steps:

- 1) Install System 6 on the hard disk.
- 2) Use Tape Backup 40SC to recover the information.
- 3) Reinstall System 7.
