System 7.5: Backward Compatibility of Modules (2/95)

Article Created: 02 August 1994
Article Reviewed/Updated: 15 February 1995

TOPIC ---

Are any of the new control panels or extensions in System 7.5 compatible with
previous versions of system software?

DISCUSSION --

The additions to System 7.5 were, for the most part, designed to operate
specifically under this environment. None of the modules were tested on earlier
versions of system software and, though they may function, they are not
supported and it is recommended that they only be used with System 7.5.
