System 6.0.7: Troubleshooting Font Loading Problems

Article Created: 13 August 1991
Article Last Reviewed: 13 July 1992

TOPIC -----

I'm having a problem with the Font/DA Mover on several networked Macintosh computers running System 6.0.7. Only one computer will load some PostScript Fonts. Other machines either lock up or have systems errors.

DISCUSSION -----

Make sure that you are using at least version 3.8 of the utility. You mentioned PostScript fonts, but Font/DA Mover only moves bit images. It is possible that older bit fonts have a problem with the latest Font/DA Mover. These fonts would be fonts that don't include the FOND Resource.

If that is the case, you should open the suitcase containing these fonts and then save them to a new suitcase. This will create a FOND resource for them. Then copy these fonts to the System file.
