System 6.0.x: Disk Distribution

Article Created: 21 April 1991

Article Last Reviewed: 14 May 1992

Article Last Updated: 14 May 1992

TOPIC -----

Are there sets of four 800K disks of System Software 6.0.7 for people without 1.4 MB SuperDrives?

DISCUSSION -----

Yes. You can still obtain System 6.0.x on 800K disks through any authorized dealer. Macintosh System Software 6.0.8 is the latest version of System 6.0.x, and it is available on either 800K or 1.4 MB (high-density) floppy disks. Remember that the files on these disks are organized in a special manner. You cannot simply take the two high-density disks containing 6.0.8 and spread the files randomly to four 800K disks. This will not work. You must have the System Software version 6.0.8 disks that are intended for the 800K format. These are labeled "System Tools," "Printing Tools," "Utilities 1" and "Utilities 2."
