VersaTerm Pro 3.1: Needed for Macintosh Portable

This article last reviewed: 12 April 1990

TOPIC -----

When running VersaTerm Pro 3.0.1 on a Macintosh Portable with the keypad option installed, the system does not map the PF2 and PF3 keys properly.

Is this a known problem?

DISCUSSION -----

VersaTerm Pro version 3.0.1 is NOT compatible with the Macintosh Portable keyboard. VersaTerm Pro version 3.1 is the correct version to use on the Macintosh Portable. For upgrades, please contact Peripherals Computers & Supplies, Inc.
