Denon CD-ROM Problem Solved with System Software Upgrade

This article last reviewed: 11 December 1990

TOPIC -----

My Denon CD-ROM doesn't seem to work with my Macintosh (running System Software 6.0). I have driver version 1.2.

DISCUSSION -----

Your Denon CD driver, version 1.2, is incompatible with System 6.0. Upgrading to System Software 6.0.3 or later should solve the problem.
